DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/10/2008 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/10/2008 has been considered by Examiner and made of record in the application file.

Reasons for Allowance

3. Claims 1-28 are allowed over the prior art record.
4. The following is an examiner's statement of reasons for allowance:

Consider claim 1, Park Hyeong-Won (Korean Intellectual Property Office (KR) Publication No. 2001-0047138 hereinafter, "Park") teaches a receiving device in a CDMA terminal and a method thereof are provided to allow to be strong in intermodulation and reduce a current consumption by using or bypassing a low noise amplifier according to an RSSI (Received Signal Strength Indicator) and a E_c/I_o (Chip Energy/Total Received Power Spectral Density).

Smith et al. (U.S PAT. 5,444,864 hereinafter, "Smith") teaches estimating the leak-through signal induced by an interfering transmitter and mixed with a desired received signal to generate a leak-through cancellation signal. A received/leak-through signal, comprised of the desired received signal and the undesired leak-through signal, and a reference signal, obtained from the interfering transmitter, are processed using matched filter computation means to estimate the gain and phase of the leak-through signal. The gain and phase of the reference signal are then adjusted in accordance with the gain and phase estimates to generate a cancellation signal that is a substantially gain and phase matched estimate of the leak-through signal. By subtracting the cancellation signal from the received/leak-through signal, the leak-through signal is substantially cancelled and the desired received signal is recovered for further processing.

Cioffi et al. (U.S PAT. 5,995,567 hereinafter, "Cioffi") teaches for removing radio-frequency noise from received signals by adaptively estimating the radio-frequency noise during data transmission using information obtained when no data is actually being transmitted. Typically, the transmitted data is received at a receiver or receiver

system employing the inventive technique. The inventive technique is particularly useful for high speed data transmission, such as VDSL and ADSL, where radio-frequency noise (interference) produced by amateur radios or other sources (e.g., bridge taps, crosstalk) is a substantial impediment to proper reception of the transmitted data.

However, the prior arts made of record, alone or in combination, fails to clearly teach or fairly suggest an integrated circuit comprising: a summer operative to receive an input signal having a transmit leakage signal and to receive an estimator signal having an estimate of the transmit leakage signal, wherein the transmit leakage signal corresponds to a portion of a modulated signal being transmitted in a wireless full-duplex communication system; and an estimator operative to receive the output signal and a reference signal having a version of the modulated signal, to estimate the transmit leakage signal in the input signal based on the output signal and the reference signal, and to provide the estimator signal having the estimate of the transmit leakage signal, in combination with other limitations, as specified in the independent claims 1, 17, 21, and 26 further limitations of their respective dependent claims 2-16, 18-20, 22-25, and 27-28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
